Polymerization: Will not occur
Conditions To Avoid: Excessive heat and contamination of any kind

Material To Avoid: acids, oxides of phosphorous, zinc, lithium, fluorine, calcium hydroxide, aluminum and 2, 4, 6-trinitrotoluene. contact with acids will release carbon dioxide gas. when mixed with lime dust and water corrosive caustic soda may be produced.

Hazardous Decomposition Products: May liberate carbon monoxide or carbon dioxide and oxides
of sodium.

SECTION X - WARNING STATEMENTS

Caution! Keep out of reach of children. May cause eye or skin irritation. Store in a cool dry place. Avoid contact with skin and clothing and excessive inhalation. Wash hands, clothing and equipment after use.

SECTION XI REACTIVITY DATA

Stability: Stable
Polymerization: Will not occur

Conditions To Avoid: Excessive heat and contamination of any kind

Materials To Avoid: Oxidizing agents attack the organic components of these products. As with other organic carbonaceous compounds, these reactions result in heat which is contained in a confined space can cause fires. Hypochlorites, chlorinated isocyanurates, and perborates are examples of oxidizing agents.

Hazardous Decomposition Products: No uniquely hazardous decomposition products are expected. If the organic portion of product is burned, as with any nitrogen containing organic material, oxides or nitrogen, carbon dioxide, and water can be produced. Partial combustion may produce, in addition to the above, soot and various oxides of carbon.

SECTION XII - SPILL, LEAK, AND DISPOSAL INFORMATION

Waste Disposal: Dispose of in a sanitary chemical landfill which complies with all local, state, and federal regulations.

Spill Or Leakage Procedures: Wear suitable clothing and protective equipment which includes rubber boots, gloves and apron and a self contained breathing apparatus. Sweep up bulk material without releasing dust and reuse wherever possible; where contaminated or unusable, dispose of
by landfilling.

SECTION XIII - SAFE HANDLING AND USE INFORMATION

Permissible Concentrations: Not established.

Respiratory Protection: Wear suitable NIOSH-approved dust masks or respiratory protector where local ventilation exhaust is not available or dusty situations are likely to result.

Ventilation: Provide ventilation to keep exposure below Nuisance Dust Limits. Local exhaust ventilation preferred.

Storage and Handling: Maintain good housekeeping, avoid creating aerosol. Keep out of direct sunlight and in cool dry place as deterioration of product and loss of activity may occur under above conditions.

Eye Protection: ANSI approved safety glasses with side protection. It is generally recognized that contact lenses should not be worn when working with chemicals because contact lenses may contribute to the severity of an eye injury.

Skin Protection: Long sleeved shirt, trousers, safety shoes, and gloves.

Hygienic Practices: Wash hands after handling, as well as any other affected skin areas. Avoid contact with food or food preparatory surfaces. If this occurs wash the area thoroughly with suitable detergent and water.

Other Protective Equipment: Eye wash facility.

SECTION XIV - SPECIAL PRECAUTIONS

Precautions To Be Taken In Handling And Storing: Maintain good housekeeping, avoid creating aerosols. For maintenance of product quality, store in dry cool (under 110°F) warehouse conditions.
